KEY ACHIEVEMENTS

- **Architectural Leadership & Platform Development:** Spearheaded the design and development of a highly scalable Omni-channel financial platform at Fidelity Information Services, resulting in a **30% reduction in API response times** and a **15% increase in overall system efficiency**. This platform is currently used by major banks, including CIT Bank and Bank of Hawaii.
- **Security Enhancement & SSO Implementation:** Successfully implemented Web SSO authentication using SAML 2.0, OAuth2, and OIDC across multiple enterprise-level applications, significantly enhancing security and streamlining user access management. Proactively identified and mitigated critical vulnerabilities using tools like Veracode and Checkmarx.
- **Framework Innovation & Development Efficiency:** Pioneered the development of a reusable WebComponents framework using ReactJS, React Query, and NodeJS, **reducing development time by an estimated 20%** and promoting code consistency across projects.
- **Legacy System Modernization & UI/UX Improvement:** Led the re-architecture of backend business layers and redesigned client UIs for multiple applications at various organizations (including Covad and others), leading to **substantial improvements in system performance and user experience**. This includes measurable improvements in page load times and user satisfaction.
- **Agile Transformation & Process Improvement:** Actively promoted and implemented Agile methodologies (Scrum, Kanban) across multiple teams, leading to **more efficient development cycles, better collaboration, and higher-quality deliverables**. Demonstrated expertise in full SDLC processes and DevOps practices.

SUMMARY

- Highly experienced IT professional with over 15 years of expertise in Enterprise Level Architecture, Design, and Development of complex multi-tier distributed applications and cloud-based microservices.
- Extensive experience in Banking & Financial, Telecom, Networking, and Insurance domains, providing deep industry-specific knowledge.
- Proven track record in designing and developing robust Single Page Applications (SPAs) using modern web technologies, including HTML5, CSS3, JavaScript, TypeScript, Angular, and Angular Material.
- Proficient in Java/J2EE technologies, such as Spring, Spring Boot, Spring Security, Hibernate, and JPA, for building scalable and secure backend systems.
- Hands-on experience in hosting enterprise-level banking applications on Amazon Web Services (AWS), leveraging services like EC2, ECS, S3, and AWS Lambda.
- Strong knowledge and practical experience with containerization technologies, including Red Hat OpenShift and Docker, for both UI Micro Frontends and Microservices.
- Expertise in implementing application security frameworks and protocols, including Spring Security, SAML 2.0, OAuth2, and OIDC, along with security hardening practices using SAST, DAST, and OSS scanning tools.
- Proficient in relational data modeling and ETL/Data Staging Design.
- Extensive experience in Object-Oriented Analysis and Design (OOAD) and Java/J2EE design patterns.
- Experienced in Agile methodologies (XP, Scrum) and full Software Development Life Cycle (SDLC) processes.
- Vast experience in application architecture, web application development, rich client development, Java web services, and enterprise systems integration.

- Experienced in Unix shell scripting, TCL, and Expect scripting.
- Strong ability in Case/System/Business Process Study, review of existing processes, and development of application logic to meet business requirements.
- Experienced in creating and maintaining project-related functional and technical design documentation.
- Well-acquainted with Support processes like Incident Management and Configuration Management.

TECHNICAL SKILLS / EXPERTISE

Architectural & Design:

- Enterprise Architecture, Solution Architecture, and System Design
- Object-Oriented Analysis & Design (OOAD), Design Patterns
- Microservices Architecture, API Design & Management, RESTful Services
- Cloud Architecture (AWS, Azure): Infrastructure as Code (IaC), Serverless, Containerization (Docker, Kubernetes)
- Data Architecture, Data Modeling, and Database Design (Relational, NoSQL)
- Security Architecture: Authentication (SAML 2.0, OAuth2, OIDC), Authorization (RBAC, OPA), Vulnerability Assessment (SAST, DAST, SCA)

Core Technologies & Leadership:

- Java/JavaEE Ecosystem (Spring, Spring Security, Spring Boot, Hibernate, etc.) - **Expert Level**
- Modern Web Technologies (Angular, React, Node.js) - **Advanced Level**
- Cloud Platforms: AWS (EC2, ECS, S3, etc.), Azure - **Hands-on Expertise**
- Containerization & Orchestration: Docker, Red Hat OpenShift, Kubernetes - **Advanced Level**
- DevOps Practices: CI/CD Pipelines (Jenkins, Maven, etc.), Infrastructure Automation
- Technical Leadership: Mentoring, Code Reviews, Architectural Guidance
- Agile Methodologies (Scrum, Kanban) - Expert Implementation

Data & Integration:

- Relational Databases (Oracle, SQL Server, MySQL), NoSQL Databases (MongoDB)
- ETL Tools: Talend, IBM InfoSphere DataStage - Design & Implementation
- Messaging Systems: JMS, ActiveMQ, WebSphere MQ
- Data Analytics & Reporting: Google Analytics, Adobe Analytics, Metabase, Celebrus, LogRocket

EDUCATION

Bachelors of Engineering (Hons) Electrical and Electronics from B.I.T.S, Pilani, India.(CGPA 8.21/10)

PROFESSIONAL SUMMARY

Digital Banking Extension - First Citizens Bank (CIT): Apr 2024 - Present

- **IT Consultant** : Empower the bank with agility to innovate and develop new digital features rapidly and securely across all customer-facing platforms.
- **Architecture & Design**: Designed and led the implementation of a new **microservices-based architecture** for key banking services
- **Containerization Strategy**: Providing architectural leadership and direction for the transition from Rancher shared container platform to **Red Hat OpenShift**.
- **Technology Leadership**: Provided technical direction for full-stack teams utilizing **ReactJS, NodeJS, Spring Boot, and Kafka**, ensuring adherence to security and performance standards.
- **Mentorship**: Mentored junior architects and engineers on best practices for scalable application design and cloud-native development.

DigitalOne – Core Product and Implementations (Fidelity Information Services): Jan 2021 – Mar 2024

- **Principal Software Engineer / Senior Solutions Architect**: Spearheaded the design and development of highly scalable Omni-channel/Next-generation financial platform applications for major banks (CIT Bank, Bank of Hawaii, etc.).
- **Architectural Leadership**: Created Proof of Concepts, comprehensive solution architecture design documents, and made significant contributions to Glass/UI architecture.
- **Security Expertise**: Implemented solutions for Web SSO Authentication (SAML 2.0, OAuth2, OIDC) and proactively monitored applications for vulnerabilities using Veracode, Burp Suite, BlackDuck, and Checkmarx.
- **Performance Optimization**: Analyzed and resolved critical performance issues, resulting in a 25% improvement in application load times and API response times.
- **Framework Development**: Co-authored a framework to build WebComponents using ReactJS, React Query, and NodeJS, enhancing development efficiency and code reusability.
- **API and Microservices**: Enhanced the BPS framework for Productized APIs/MicroServices, contributing to a more robust and scalable backend and a significant increase in API efficiency.
- **Analytics Integration**: Designed solutions for click-stream analytics using Celebrus and integrated with LogRocket and LaunchDarkly for in-depth user behavior analysis.

ChannelUnited Platform – Core Product and Implementations (Zenmonics Inc): Apr 2013 – Dec 2020

- **Technology Lead/Lead Application Architect**: Led the design of the architectural framework for Glass (Front-end/UI Tier) to build robust Single-Page Applications (SPAs).
- **Strategic Design**: Developed conceptual and high-level designs for core products and features, ensuring alignment with business objectives.
- **Security Focus**: Co-authored crucial security documents and implemented robust security measures.
- **Estimating and Planning**: Provided accurate high-level estimates for business cases and development schedules, aiding in project planning.
- **Identity Provider Integrations**: Successfully integrated with multiple Identity Providers (OKTA, Ping Identity, AWS Cognito, Shibboleth), ensuring seamless authentication.
- **Channel Implementation**: Designed and implemented Unassisted/Assisted channels with multi-tenancy support, catering to diverse client needs.
- **Client Solutions**: Played a key role in assisting with the implementation of the solution for multiple banks, demonstrating client-facing skills.

Video Teller/Online Account Origination (Zenmonics Inc): July 2012 – Apr 2013

- **Lead Glass/UI Developer:** Led the development of rich user interfaces using GWT, GWTP, and SmartGWT.
- **Documentation:** Created detailed technical design documents and meticulously maintained project documentation.
- **Web SSO Implementation:** Implemented SAML 2.0-based Web SSO for secure user authentication.

FISIS Print (American Modern Insurance Group): June 2011 – May 2012

- **Senior Developer:** Designed and developed applications using object-oriented principles and design patterns.
- **Technical Documentation and Database Design:** Created comprehensive technical design documents and database schemas for audit logging to ensure data integrity and traceability.
- **XML Processing:** Utilized JDOM/XPATH and XSLT for robust XML processing, transformation, and data manipulation.
- **Web Services Integration:** Implemented web service calls for seamless system integration.
- **Agile Methodology:** Followed Agile methodology (Scrum) for iterative development and efficient project management.

WebCIM, eDAO, Profile WebClient, WebCSR, Ally Bank BillPay (Fidelity Information Services): Apr 2010 – Mar 2010

- **Lead UI Developer:** Designed and developed user interfaces using GWT and SmartGWT, creating rich and interactive user experiences.
- **Technical Design and Development:** Created detailed design documents and developed GWT RPC servlets for backend communication.
- **Agile Development and Spring Framework:** Utilized Agile methodology (Scrum) and implemented Spring 3.0's IOC for efficient development and dependency management.
- **Testing and Migration:** Performed UI testing with Selenium and created unit tests to ensure application quality. Played an active role in migrating modules to GWT/SmartGWT.
- **Database Integration:** Created Java adapters for the MUMPS database and used OpenSAML for authentication, ensuring secure access.

ASYST - Order and Quote Management System (Applied Industrial Technologies): Jul 2009 – Nov 2009

- **Senior Software Engineer:** Designed and implemented web services for system integration using Apache Axis 2.0.
- **Security Configuration:** Configured Apache Rampart to ensure secure SOAP message communication.
- **Testing and Code Reviews:** Created JUNIT test suites and performed peer code reviews to maintain high code quality.

MinuteCode, AOC (Deloitte Consulting): Apr 2009 – Jun 2009

- **Software Engineer:** Implemented minute code functionality using Java, EJB 3.0, and Open JPA, building robust backend logic.
- **UI Integration:** Used Spring 2.0 for wiring backend services with the UI, ensuring seamless data flow and interaction.

JRater/JUtil (Nationwide Insurance): Mar 2007 – Mar 2009

- **IT Specialist:** Designed applications using object-oriented principles and design patterns, ensuring maintainable and scalable solutions.
- **Architectural Leadership and Development:** Co-authored architectural decision documents and developed web-based insurance product management software.
- **UI Development:** Designed and developed the UI using JSF/ADF Faces/AJAX, creating responsive and user-friendly interfaces.
- **ETL Requirements:** Specified requirements for an ETL solution using Talend 2.0, facilitating data integration.
- **Design and Implementation:** Created UML diagrams and implemented data access using Spring DAO/Hibernate.
- **Security and Testing:** Implemented authorization using Spring Security and maintained high code coverage through comprehensive testing.

nGenius Performance Manager/Flow Recorder (NetScout Systems Inc): Mar 2005 – Feb 2007

- **Engineer II:** Wrote system use cases, created UML diagrams, and ensured clear requirements and design.
- **Backend Development:** Designed business service components using Java/J2EE technologies.
- **Data Persistence and UI:** Used Hibernate for ORM and created Java Swing UI for data visualization.
- **Testing and Optimization:** Developed JUNIT test cases/suites and optimized server-side protocol decode performance.
- **Module Development:** Developed the HTTP/VOIP Session Reconstruction and Replay module.

Covad Order Management System (EAGLE)/COLTS (Cognizant Technology Solutions): Aug 2003 – Feb 2005

- **Programmer Analyst:** Played a key role in developing and maintaining the Covad Order Management System (EAGLE) and Collocation Tracking System (COLTS).
- **Requirement Analysis and Design:** Authored detailed system use cases and created UML diagrams, ensuring a clear understanding of project requirements.
- **Backend Development:** Coded EJBs and applied design patterns, contributing to a robust and scalable backend.
